Curriculum Vitæ of Andrew C. M. Austin

Personal Information

Date of Birth: 1 August 1985.

Citizenship: New Zealand.

Academic Positions Held

11/2016–present: Lecturer, Department of Electrical and Computer Engineering, The University of Auckland, Auckland, New Zealand.

4/2014–10/2016: Scientist with the Telecommunications Circuits Laboratory, Institute of Electrical Engineering, École Polytechnique Fédérale de Lausanne, Lausanne, Switzerland.

9/2011–12/2013: Postdoctoral Fellow with the Electromagnetics Group, Department of Electrical and Computer Engineering, University of Toronto, Toronto, Canada.

2/2011–8/2011: Professional Teaching Fellow, Department of Electrical and Computer Engineering, The University of Auckland, Auckland, New Zealand.

Education

2007–2012: Doctor of Philosophy in Electrical and Electronic Engineering, The University of Auckland, Auckland, New Zealand.

2003–2007: Bachelor of Engineering (Electrical and Electronic) with First Class Honours, The University of Auckland, Auckland, New Zealand.

Funding Attained

2018: Food and Health Programme Seed Funding, University of Auckland (Associate Investigator), NZD$ 10,000, "Smart packaging for kiwifruit: printable radio frequency sensors to monitor ripeness".

2018: Faculty of Engineering, University of Auckland CAPEX grant (Primary Investigator), NZD$ 96,000, "Experimental wireless communications". For laboratory equipment to extend signal generation capabilities available in the Telecommunications Lab.

2017: Faculty of Engineering, University of Auckland, Faculty Research and Development Fund (Primary Investigator), NZD$ 30,000, "Reconfigurable reflect-array antennas for indoor millimetre-wave systems".

2017: New Zealand National Science Challenge: Resilience to Nature's Challenges (Associate Investigator), NZD$ 240,000, "Electricity distribution resilience framework informed by west coast alpine fault scenario". Investigating the co-dependencies of the electricity and communications networks following a natural disaster.

2016: Faculty of Engineering, University of Auckland CAPEX grant (Primary Investigator), NZD$ 25,000, "Millimetre-wave communications engineering". For equipment to set up a mmWave experimental testbed.

Accomplishments

2011: University of Auckland School of Graduate Studies Dean's List.

2007–2011: New Zealand Tertiary Education Commission Bright Futures Top Achiever Doctoral Scholarship.

2007–2011: University of Auckland Doctoral Scholarship.

Selected Publications

Books

C.D. Sarris and A.C.M. Austin, "Uncertainty Quantification in Computational Electromagnetics: Theory, Techniques and Advanced Applications", proposal accepted and in preparation for *Cambridge University Press EuMA High Frequency Technologies Series.* Expected publication date: 2018.

Journal Papers

J11 A.C.M. Austin and M.J. Neve, "Efficient field reconstruction using compressive sensing", *IEEE Trans. Antennas and Propagation,* vol. 66, no. 3, pp. 1624–1627, Mar. 2018.

J10 S. Giovinazzi, A.C.M. Austin, R. Ruiter, C. Foster, M. Nayyerloo, N.-K. Nair and Liam Wotherspoon, "Resilience and fragility of the telecommunication network to seismic events: Evidence after the Kaikoura (New Zealand) earthquake sequence", *Bulletin of the New Zealand Society for Earthquake Engineering,* vol. 50, no. 2, pp. 318–328, June 2017.

J9 M. Yousefbeiki, A.C.M. Austin, J.R. Mosig, A.P. Burg and J. Perruisseau-Carrier, "Spatial multiplexing of QPSK signals with a single radio: Antenna design and over-the-air experiments", *IEEE Trans. Antennas and Propagation,* vol. 64, no. 12, pp 5131–5145, Dec. 2016.

J8 A.C.M. Austin, "Wireless channel characterisation in burning buildings over 100–1000 MHz", *IEEE Trans. Antennas and Propagation,* vol. 64, no. 7, pp. 3265–3269, July 2016.

J1 A.C.M. Austin, M.J. Neve, G.B. Rowe and R.J. Pirkl, "Modelling the effects of nearby buildings on inter-floor radio-wave propagation", *IEEE Trans. Antennas and Propagation,* vol. 57, no. 7, pp. 2155–2161, July 2009.

Conference Papers

C12 A.C.M. Austin, M.J. Neve, and D. Guven, "Indoor millimetre wave channel measurements for 5G wireless systems", accepted for presentation at *2018 European Conference on Antennas and Propagation (EuCAP)*, April 2018.

C11 A.C.M. Austin, O. Afisiadis, and A.P. Burg, "Digital predistortion of hardware impairments for full-duplex transceivers", accepted for presentation at *2017 IEEE Global Conference on Signal and Information Processing (GlobalSIP)*, Nov. 2017.

C10 O. Afisiadis, A.C.M. Austin, A. Balatsoukas-Stimming, and A.P. Burg, "Analysis of full-duplex wireless links with asymmetric capacity requirements", accepted for presentation at *2017 Asilomar Conference on Signals, Systems, and Computers*, Oct. 2017.

C9 A.C.M. Austin, A. Balatsoukas-Stimming and A.P. Burg, "Digital predistortion of power amplifier non-linearities for full-duplex transceivers", in *IEEE workshop on Signal Processing Advances in Wireless Communications (SPAWC)*, July 2016.

C8 O. Afisiadis, A.C.M. Austin, A. Balatsoukas-Stimming and A.P. Burg, "Sliding window spectrum sensing for full-duplex cognitive radios with low access-latency", in *2016-Spring IEEE Vehicular Technology Conference*, June 2016.

C7 A.C.M. Austin, O. Afisiadis, A. Balatsoukas-Stimming and A.P. Burg, "Demonstration of concurrent spectrum sensing for cognitive radio using self-interference cancellation", in *ACM International Symposium on Mobile Ad Hoc Networking and Computing (MobiHoc'15)*, pp. 407–408, June 2015.

C6 A.C.M. Austin, N. Sood and C.D. Sarris, "Quantifying uncertainty in ray-tracing models of radiowave propagation using polynomial chaos", in *European Conference on Antennas and Propagation*, pp. 1768–1770 April 2014.

C5 A.C.M. Austin and C.D. Sarris, "Efficient analysis of parameter uncertainty in FDTD models of microwave circuits using polynomial chaos", *IEEE International Microwave Symposium*, June 2013.

C4 A.C.M. Austin and C.D. Sarris, "Ultra-wideband interference modelling for indoor wireless channels using the FDTD method", in *URSI/IEEE Antennas and Propagation Symposium*, July 2012.

C3 M.J. Neve, A.C.M. Austin and G.B. Rowe, "Electromagnetic engineering for communications in the built environment", in *European Conference on Antennas and Propagation*, March 2012 (Invited Paper).

C2 A.C.M. Austin, M.J. Neve and G.B. Rowe, "Modelling interference for indoor wireless systems using the FDTD method", in *URSI/IEEE Antennas and Propagation Symposium*, June 2009.

C1 A.C.M. Austin, M.J. Neve and G.B. Rowe, "Modelling inter-floor radio-wave propagation in office buildings", in *URSI/IEEE Antennas and Propagation Symposium*, July 2008.

Professional Activities and Service

2018–present: Member of the Faculty Research Committee.

2018–present: Chair of the Electrical and Computer Engineering Staff-Student Consultative Committee.

2018: Member of the Technical Program Committee for the 2018 Australian Microwave Symposium.

2017–present: Counsellor for the University of Auckland IEEE Student Branch.

2016: Member of the Technical Program Committee (Antennas and Propagation Track) for the 2016-Spring and 2016-Fall IEEE Vehicular Technology Conferences.

2012: Member of the Technical Program Committee (Antennas and Propagation Track) for the 2012-Fall IEEE Vehicular Technology Conference.

2008–present: Reviewer for the following journals—IEEE Transactions on: Communications, Wireless Communications, Antennas and Propagation, and Microwave Theory and Techniques; and IET Proceedings on Microwave Antennas and Propagation.

Graduate Student Supervision

10/2017–present: Dev Singh, Doctor of Philosophy, "Analysis of trust in heterogeneous wireless networks"

7/2017–present: Damla Guven, Master of Engineering, "Development of a testbed for 60 GHz millimetre-wave systems"

2/2018–present: Farrukh Latif, Master of Engineering, "Resilience of communication systems to natural hazards"
